

Alive and Well Communities is proud to partner with the Missouri Department of Elementary and Secondary Education to provide educators support in meeting the social-emotional needs of their students, colleagues, and the families they serve.

This partnership will provide all Missouri districts the opportunity to build capacity to become trauma-informed. It will also provide districts access to tools and supports to meet the immediate and emerging social-emotional needs of students and staff that have been amplified as a result of COVID-19.

Over the next 12 months, educators across the state of Missouri will have the opportunity to participate in several learning and engagement opportunities. Details for these programs will evolve based on the emerging needs of educators throughout the 2020-21 school year. You can find the most up-to-date information at: MoTraumaSchools.com,
